

## What is Technology for HOME?

Technology for HOME offers a team approach to person centered assistive technology (AT) consultation and technical assistance to help individuals with disabilities live more independently. People who want to stay home or move home direct the outcome; we assist with the technology resources. The AT consultant will provide possible solutions and communicate with the county to develop a plan.

## What does Technology for HOME offer?

- Consult with the Person – Our person-centered team will meet with the person at locations of their choice to assess their needs
- Connect to Resources – The AT team will connect with the person their school, their family, and across their lives to resources that will help them live in their own homes more independently
- Conduct Follow-up Services – Technology for HOME will follow-up with the person to ensure the resources resolved any issues that were found during consultation
- This program provides services for AT but **not funding for the AT equipment**; that plan will be outlined and communicated clearly with the person and county as a team develops a plan.

## Who qualifies for this service?

Individuals who qualify for this service need to:

- Be receiving home care or home and community based waiver services
- - AND -
- Be living in their own home and potentially benefit from AT for safety, communication, community engagement, or independence, **OR**
- Be seeking to live in their own home and need AT to meet that goal

## For more information...

- Counties, tribes, eligible individuals, families and providers of services to people in their own homes may contact Sue Redepening, program manager for the Minnesota Department of Human Services Technology for HOME grant, at LiveLife Therapy Solutions, Inc.
